DETAILED ACTION

This communication is in response to Applicant's amendment filed on October 23, 2009. Claims 1, 3-5, 8-10, 13-15, 17-19 and 21-23 are pending in the application.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3-5, 8-10, 13-15, 17-19 and 21-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Here, the state of the law with respect to statutory subject matter eligibility under §101 is evolving and is presently an issue in several cases under appeal at the Federal Circuit with regard to process claims. As presently understood, based on Supreme Court precedent and recent Federal Circuit decisions, [see *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)] a §101 statutory process must (1) be tied to another statutory class (e.g. such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. If neither of these requirements is met, a method is not a

Art Unit: 3691

patent eligible process under §101 and should be rejected as being directed to non-statutory subject matter.

To qualify as a §101 statutory process, the claim should (1) positively recite another statutory class (e.g. thing or product) to which it is tied (e.g. by identifying the apparatus that accomplishes the method steps) or (2) positively recite the subject matter that is being transformed (e.g. by identifying the material that is being changed to a different state).

The machine-or-transformation test is a two-branched inquiry; an applicant may show that a process claim satisfies § 101 either by showing that his claim is tied to a particular machine, or by showing that his claim transforms an article. See *Benson*, 409 U.S. at 70. Certain considerations are applicable to analysis under either branch. First, as illustrated by *Benson*, the use of a specific machine or transformation of an article must impose meaningful limits on the claim's scope to impart patent-eligibility. See *Benson*, 409 U.S. at 71-72. Second, the involvement of the machine or transformation in the claimed process must not merely be insignificant extra-solution activity. See *Flook*, 437 U.S. at 590.

Examiner notes that providing a user interface to display data does not impose any meaningful limit on the scope of the claim and is merely insignificant extra-solution activity.

To qualify as a § 101 statutory process, Applicant should amend the claims such that the steps are carried out via a processor or computer (in the body of the claim and not in the preamble).

Response to Arguments

Applicant's arguments filed on October 23, 2009 have been fully considered but they are not persuasive. In particular, independent claims 1 and 8-10 have been amended to include that "wherein at least one of the above steps is performed by at least one processor". Given the claim the most reasonable broadest interpretation, the at least one of the steps can be the receiving step or the presenting step. Both of these steps are merely considered insignificant extra-solution activity. In the previous rejection, the "Examiner notes that providing a user interface to display data does not impose any meaningful limit on the scope of the claim and is merely insignificant extra-solution activity". Therefore, the rejected under 35 U.S.C. 101 non-statutory subject matter is maintained.

Conclusion

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no

Art Unit: 3691

event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
